

ISOLATOR BAR LOCKOUT

Part Code: IBL-1

APPLICATION:

The Isolator Bar Lockout is designed specifically to Lock Out Isolator Bars Switches and Motor Control Centres. Normally they have a lockable switch handle on the outside of the cabinet, however when the cabinet door is open this cannot be locked. The IBL-1 has been designed to prevent access to the most commonly used isolator bars of various lengths and sizes.

USE FOR:

When cabinet door is open and isolation is required.

- Includes 4 different disc sizes to suit most handles
- 2 different lengths of PVC Extensions for longer bars (can be joined with supplied joiner for longer arms)
