ABOUT LOCKOUT / TAGOUT

Lockout / Tagout is all about controlling hazardous energy, to prevent accidents, injury to people and damage to plant and equipment.

In its basic form Lockout is - before working on equipment - manually isolating hazardous energy sources, such as electricity, hydraulics, compressed air, steam or stored energy, and placing a lock on the isolation point, preventing it from being operated until lock is removed.

Tagout is placing a Tag on the locked isolation point informing about the isolation - why it is isolated, by whom and when and advising not to remove or operate.

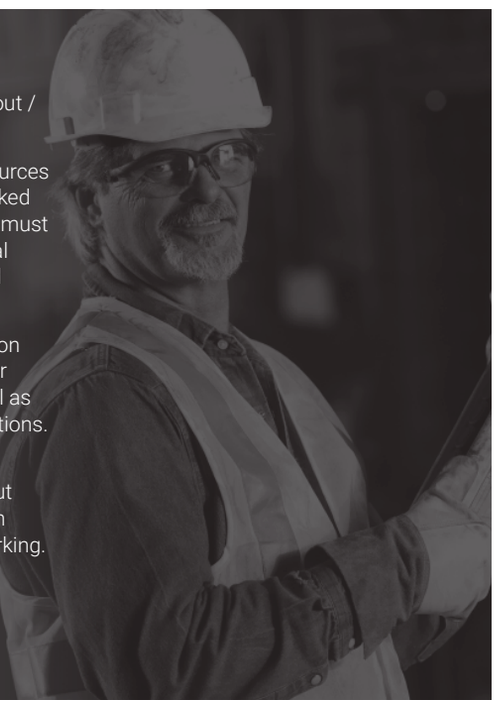
Procedures on how to perform Lockout / Tagout should be in place in all workplaces where necessary. In larger plants and factories isolating energy sources can be complicated and plans should be in place to ensure safety of workers.

In many industries and in most Australian States, the use of Lockout / Tagout are now mandatory.

For Lockout Purpose all energy sources must be clearly identified and marked with signage or labels. Equipment must also be available to enable physical placement of padlocks on isolated energy sources.

This Catalogue provides information on Lockout / Tagout Equipment for all types of energy sources, as well as labeling, signage and storage solutions.

Our Company have manufactured and specialised in Lockout / Tagout Equipment since 1992, and we can provide you with tools for safe working.



Together we can find the best Lockout Solution for you.

Registered or Non-Registered?

Our SLP-438, 450 and 550 range of padlocks can be **Keyed Alike** (1 key can open several locks) and **Master Keyed** (1 Master Key can open several different locks, keyed individually or keyed alike). There are 2 options for Keying Alike - Registered or Non-Registered:

Registered: The special keying is done by our locksmith when required. The padlock and key is engraved with a unique number. At a later stage should additional locks or keys be required for the set, simply quote the number on the existing lock or key.

Non-Registered: These sets of Keyed Alike locks are more economical than our Registered locks as we get them keyed in bulk at our factory, kept in stock for immediate dispatch. You cannot add extra locks or keys to these sets once purchased. For available Non-Registered lock sets please see page 21.

Lockout devices for Circuit Breakers Permanently fixed to Distribution Boards

Mounting Set

=

CIRLOCK System

APPLICATION:

The CIRLOCK System is a unique system of Lockout Devices for circuit breakers, which can, when properly installed and used, help to prevent unintended energization of electrical circuits.

The system consist of basically two parts:
A **MOUNTING SET** to be attached to the circuitbreakers escutcheon plate, normally in full lenght of the cut-out made for C/B's. A slot and hole are then available for each 'pole' on the board. A number of **LOCKOUT ARMs**, one for each circuit breaker, are then inserted in the slots in Mounting Sets during installation, or later. Because various brands of circuit breakers have different pole widths and sizes, Mounting Set and Lockout Arm must be ordered to fit the brand and type of circuit breakers in use. See pages 38 & 39 for details.

ORDERING EXAMPLE
Lockout Devices for a 24 pole (2x12 pole) distribution board for miniature (18mm) circuit breakers, fitted with 13 Terasaki DIN-T circuit breakers, a mix of 3- pole and 1- pole. ORDER: 2 only Mounting Sets Type MAM-12 and 13 Lockout Arms Type ALA-M-1. Lockout Arms can also be installed for 'Spare' poles now or later. See pages 38 & 39 on part numbers to fit types of circuit breakers.

MATERIAL
The CIRLOCK System is made in Australia from Clear Anodised Aluminium, Plastic Brackets and Coated Steel Hinge Rods.

MAMM- Mounting Sets:
MAMM's are same size as MAM-'s (i.e. an MAMM-12 are same length as MAM-12), but have provision for a Lockout Arm for every 9 mm (module 18 mm) in its full length. Are to be used where there are 1/2 module (Aux. contacts or similar) mounted with CB's, or for 27 mm wide modules (15 kA CB's).

EXAMPLE: MAMM-24 is for 24 single poles of 18 mm wide modules.

To use MAMM for 27 mm wide CB's: A 27 mm module is 1.5 times 18 mm. Convert Number of 27 mm poles into 18 mm poles, i.e. 24 poles of 27 mm is 36 poles of 18 mm. For one row of 24 single poles of 27 mmCB's, a MAMM-36 Mounting Set is needed.

If in doubt call 07-54452910 and ask for technical support. We will be happy to help.

Ordering Example:

For 1 row of 15 Heinemann CF single pole CB's - order: 1 only MAH-15 Mounting Set.
For 24 pole DB with 2 rows of 12 single pole Miniature CB's - order: 2 only MAM-12 Mounting Sets.

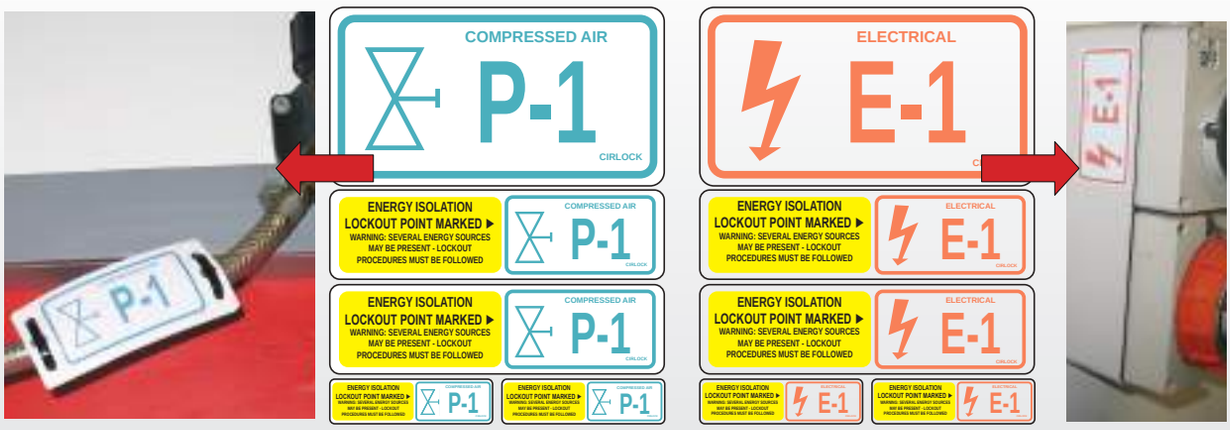
ENERGY SOURCE LABEL KIT

Make it simple for all employees to identify HOW and WHERE to isolate ALL energy sources for machinery in the workshop, factory or on site.

STEP 1

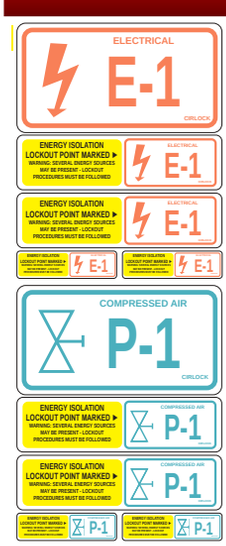
Place ID label on all Energy Isolation Points - ie Valves or switches that supply energy/power to the machinery.



STEP 2

Place the smaller matching label on Machine / Equipment

How to use:



Place this large label on Energy Isolation Point

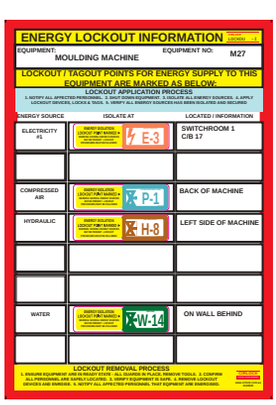
Place these smaller labels on Machine / Equipment

Place this large label on Energy Isolation Point

Place these smaller labels on Machine / Equipment

All Markers come with 4 relations markers in 2 different sizes. Large Marker is placed on or near Energy Lockout Point, i.e. Electrical Switches or Pressure Valves.

Smaller machines: Small Relation Markers are placed on machine or equipment for easy recognition of Lockout Points.
Larger equipment: On large equipment or machines, it is recommended to use Energy Information Lockout Label Chart in either A4 or A6 format. Relation Markers are placed on Lockout label chart in relevant positions. Additional information can also be added.



Information can be added with printed out labels or written directly with pen or marker. Un-used energy names can be blanked out with supplied extra labels. Apply clear protective over laminate.

Cirlock Self Adhesive Labels are made from High Quality Gloss Vinyl printed with Eco Friendly ink with an outdoor average lifespan of 2-3 years.

Pipe Identification Markers are printed on a Matt Vinyl with an Industrial Strength adhesive. Pipe ID Markers can also be coated with a clear laminate for excellent protection and extra long life.

Danger Tags, Warning Tags and other custom made tags are as standard made from High Quality Poly material, to withstand water and grease, and for long term durability. For re-usable tags extra thick material or heavy duty lamination can be used.
All tags have as standard a 8mm metal eyelet. Please request other options if needed (eg string).

Signs can be supplied with either Polypropylene backing (1.4mm), Coreflute (5mm) or a Metal backing (0.55mm) as standard.

Cirlock signs, labels and markers are, where possible, made to Australian Standards.

We use only high quality ABS plastics. See page ?? for ordering form.

Need Switchboard Labels? Contact us now, fast delivery!

We can supply you with all your switchboard and other labelling requirements. Traffolyte signs and labels were very popular in the past. However, phenolic dust is now recognized as a health hazard (castergenic properties) and so other abs safe plastics have been manufactured to deliver same and better results using new and improved modern safe formulas. We use only high quality ABS plastics.

PIPE ID MARKERS

Pipe Markers help to quickly and easily identify pipes contents. This is especially helpful in an emergency situation. It also saves time during maintenance. Australian Standard AS 1345-1995 - "Identification of the contents of pipes, conduits and ducts" - specifies guidelines for pipe marking. CIRTAG® standard Pipe Markers complies to AS 1345-1995 Standards.

Pipe Marker Layout:

A marker consists of printed text on a coloured background with a contrasting border and a chevron to show flow direction. The colours are determined by the pipes contents. Text and marker sizes are also specified.
Markers must be placed adjacent to all junctions, valves, wall penetrations etc. Markers shall be spaced no more than 8m apart, except for long uninterrupted straight runs of external services where spacing shall not exceed 50m.

Supplementary Colour Markers:

Additional colour markers can be used as 'wrap around' bands to help specify pipe content and danger levels.

Self Adhesive Pipe Markers
Pipe Markers are made from a Premium Grade self adhesive indoor/outdoor Vinyl. Simply peel marker off the release coated backing paper and press the marker in place. Weather resistant ink provide years of performance. It is recommended to Band each end with Supplementary Markers, Arrow Tape or Warning Tape.
